

Quick guide to C-GBFB audio panel

- 1 - Use knob to select on which radio to transmit and receive radio calls (COM1 or COM2)
- 2 - Use button to select radio on which to monitor a secondary frequency if needed

The example below shows that COM 1 is selected (1) to transmit and receive calls on 118.50 and COM 2 is selected (2) to monitor a second frequency which is 126.70.

> Avoid having the same frequency twice on any radio <

Keep the "Auto" button pushed-in
